

SafeAccess is an access control system that allows you to manage your access control (people and vehicles) through control equipments and integrated peripherals.

The software has several native features available and integration with several other subsystems such as monitoring intrusion alarms, monitoring of fire alarm, automation and CCTV.

## Topology

## Main features

- Web interface
- Multisite management
- Complete audit
- Flexible and scalable architecture
- Integration with other systems

## Benefits

- Standardization and process agility
- Accurate and centralized information
- Management excellence
- Operation flexibility
- Optimization of human resources

## Differentials

- Diagnostic tools
- Time clock
- Remote hardware update
- Parking and Cafeteria control
- Customizations

## User Management

- User classification by group
- Visitors, third parties and employees
- Direct-To-Card Printers
- Black list
- Scheduling visits

## Access Monitoring

- CCTV Integration
- Floor plan
- Alarm Reception
- Violated route alarm
- Event graphics

## Access Management

- Anti-passback control
- Dual and triple authentication
- Companion control
- Access Control Policies with AD integration
- Access Lock rules
